**"Serving British Columbia  
Proudly Since 1946"**

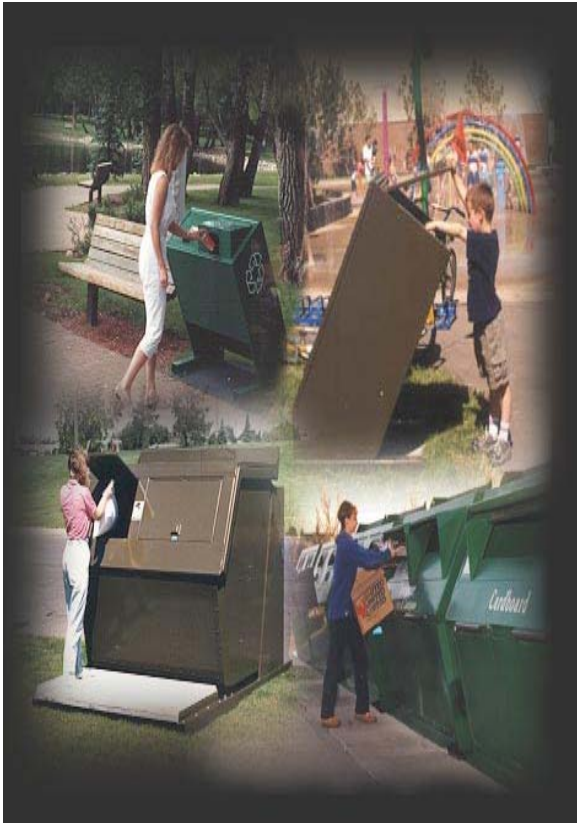

**\* Residential Bear-  
Resistant Containers**

Rollins Machinery has been the leading provider of Bear Management Systems across British Columbia for over 20 years.

**1-800-665-9060  
[jeff@rollinsmachinery.ca](mailto:jeff@rollinsmachinery.ca)**

Rollins has provided BC alone with over 5000 Bear-Resistant Haul All containers.

The Haul All Container System is used in over 250 national, state, and provincial parks across Canada and the U.S. Because of its reliability, the BC provincial government has standardized the container.

**Concerned HOMEOWNERS are now taking a step towards reducing conflicts between people and bears by using residential bear-resistant containers!**

Designed for residents, farms, and acreages, our residential bear-resistant containers:

- Safely secure garbage, pet food, and other waste from bears and wildlife.
- Are a cost effective method for communities and municipalities interested in designing a bear-resistant waste management program.
- Can be rolled with ease to different locations and are compatible with fully & semi-automated systems (both Two-Bar and Comb lifters).

*\*Residents Should Undo Clasps.*

Our containers with bear-resistant reinforcements have been tested and certified by the Interagency Grizzly Bear Committee (IGBC), Montana Fish, Wildlife & Parks (MFWP), and Living with Wildlife Foundation (LWWF).
